DEPLOYING APPS ACROSS A GLOBAL NETWORK

Errol R. A. Meynard, Senior Application Manager

Founded in 1981, Perkins Eastman designs sustainable, human and innovative places for various sectors: Health, Education, Offices & Retail, Residential, Sport, Transport, and more.

In 2013, Perkins Eastman was looking for a cost-effective solution to deploy CAD/CAM design aid software and other Windows apps to a global network of users.

They installed TSplus *Enterprise* edition on their servers to enable Remote Desktop and give full access to specialized professional applications to all their employees around the world.

Using TSplus, Perkins Eastman has been able to deliver secure and reliable connection to their corporate servers so that employees can work from anywhere in the world, at any time, no matter their Operating System or device.

OPTIMIZING NETWORK ADMINISTRATION

TSplus simplifies the life of IT Admins with low IT costs and easy central Management!

Using TSplus to give remote access from any location to the professional apps hosted on the central server has brought multiple benefits:

- By eliminating the need for a local installation of all professional tools, TSplus has helped greatly reducing IT investments in hardware and software.
- The central AdminTool makes it so easy to set up and configure TSplus that it could be globally deployed with minimum IT staff and training.
- - With Data and Applications being hosted in a central place, TSplus has contributed to increased security and mobility while minimizing risks for Perkins Eastman's business data.
- TSplus *Enterprise* offers great additional benefits such as a centralized Servers Farm Manager and a Secure Gateway.

"Great product. I appreciate that the team stays on top of MS updates and patches to keep workflow going."

"At Perkins Eastman, we believe design is a process for people, by people. Working closely with clients and collaborators, we identify mutual goals, build trusting relationships, and discover solutions for any scale. Whether we're envisioning a branded workplace, a new state of the art hospital or school, or a citywide masterplan, we engage in an integrated design process, always keeping people at the heart of what we do."

A global design firm dedicated to the human experience, we are a network of more than 1,000 thinkers, dreamers, and doers spread across 16 practice areas and 19 interdisciplinary studios worldwide. While our practice is global, our work is local, and we create dynamic spaces where people can live, learn, work, play, and heal. We get to know the places where we design and the cultural and architectural contexts that make them special. Our designers combine analysis with ingenuity, leveraging their skills and technology to create practical, holistic environments."
